Outside mount, 3 1/2" louvers, 2" Camber Deco frame, InvisibleTilt™, with designer sill cap in Chestnut

ENVIRONMENTALLY CONSCIOUS

Elegance Normandy® offers discerning homeowners an incomparable solid wood shutter with distinctive wood grain and rich consistent characteristics. It is made from Phoenix Wood®, a tree that grows back in just 7 years after harvest, making Normandy® an environmental champion with finesse.

FROM TRADITIONAL TO CONTEMPORARY

For the ultimate brilliance and resilience, we use multiple sequences of sanding and thin layers of coating for solid colors or stains. This labor-intensive process creates a uniquely grained and lustrous finish, and creates a look befitting your style – from warm and rustic to sleek and refined.

ANY WINDOW, ANY SHAPE

The Normandy® specialty collection includes shapes beyond conventional squares and rectangles. If you have arches, hexagons, sliders, French doors, or any type of atypical window opening, we've got you covered! Virtually every window in your home can be dressed with Normandy® Shutters.

QUALITY AND VALUE UNMATCHED

We employ the same time-honored woodworking techniques used by artisans of exceptional home furnishings.

STABILITY

Quarter-sawn louvers provide a tighter grain, enabling increased durability, resistant to cupping, twisting and warping.

DURABILITY

Traditionally used in demanding furniture and building construction, mortise-and-tenon joints are designed to withstand the shear stress and racking forces that occur during shutter operation. This makes the mortise-and-tenon an ideal joint for shutters.

Mortise-and-tenon joint

RESILIENCE

Prescription Wood Conditioning®, our patented wood drying technique, dries wood to emulate the environmental conditions of the shutter installation site. This process reduces post-installation shrinking and swelling, for increased shutter longevity.

ENDURANCE

Multiple layers of wood are bonded together to bolster the stability of the core of the stile, making for a robust and hearty support system for your shutter panel.

Reinforced engineered stile

KEEP YOUR OPTIONS OPEN

Options make the ordinary extraordinary. With Normandy® Shutters you can keep it simple or have it all. That's the beauty of making it your own!
